DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 1, it is unclear the preamble set forth an electronic apparatus or an input device being claimed since there is nothing precedent the word comprising. As per claim 3, it is unclear if "wherein a supporting member" is the same as "a retaining member", as recited in claim 1, or not. Does applicant mean "wherein the retaining member comprises a supporting member being mounted (which is mounted) so as ... "?; Same problem occurs as in claim 5 as well.

As per claim 7, the recitation "an electronic apparatus having a main unit rotatably attached to the main unit", found in lines 1-2, renders the claim indefinite because "a main unit" cannot rotatably attached to itself. Furthermore, "the display unit, in line 4, lacks antecedent basis in the claim. It is suggested that applicant changes the former mentioned recitation to -- an electronic apparatus having a display unit rotatably attached to a main unit—in order to overcome this rejection.

Art Unit: 2189

As per claim 8, the recitation "when the supporting member is lowered", found in line 6, renders the claim indefinite because it is not clear what the supporting member being lowered with respect to.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Clancy et al. (US Patent 5,168,427)

As per claim 1, Clancy discloses an electronic apparatus detachably connected to an input device 10, main unit 14, a display unit 32 rotatably attached to the main unit, and a retaining mechanism (wherein pin 46, latch assembly 54) retaining at least one portion of the input device 10 into a space formed between the display unit 32 and the main unit 14.

As per claim 2, Clancy discloses the retaining mechanism comprises at least one supporting member 80.

As per claims 3 and 5(as best understood) Clancy discloses the retaining member comprises a support member/an engaging member 80 which can be storable in the main unit when the input device is not being stored.

As per claim 4, Clancy discloses the retaining mechanism comprises an engaging member 46 engaging the main unit 14 and the input device 10.

Application/Control Number: 09/512,884

Art Unit: 2189

As per claim 7, Clancy discloses an input device 10 detachably connected to an electronic apparatus having a display unit 32 rotatably attached to a main unit 14, the input device comprising at least one engaging member 46 engaging the main unit so that at least one portion of the input device is retained into a space formed between the display unit and the main unit.

As per claim 8, Clancy discloses an electronic apparatus comprising a main unit 14, a keyboard 10 detachable from the main unit, a display unit 32 rotatably attached to the main unit, and a supporting member 80 rotatably mounted to the main unit to hold the keyboard is mounted on the supporting member, wherein when the keyboard is mounted on the supporting member and the display unit is rotated down, the keyboard 10 is disposed in a space between the display unit 32 and the main unit 14.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Clancy et al. (US Patent 5,168,427) in view of Kimura et al. (US Patent 6,108,716)

Clancy discloses all the limitations as above except an electronic apparatus further comprising detector detecting each of a storage and a removal operation of the input device and controlling predetermined operation of the electronic

Art Unit: 2189

apparatus according to signal of detector. However, Kimura discloses detect sensor which detects keyboard is mounted on the system, terminals which send or receive signals to or from terminal for keyboard of system. (col.10, lines 24-42)

It would have been obvious to one having ordinary skills in the art at the time the invention was made to incorporate Kimura's teaching into Clancy's method so as to provide a data processing unit which stabilizes the system, with the keyboard detached from the system regardless of the position of the display unit with respect to the system. (col.1, lines 45-50)

Conclusion

4. A shortened statutory period for reply is set to expire THREE months from the mailing date of this communication. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) months from the mailing date of this communication. If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) months from the mailing date of this communication. Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kim Huynh whose telephone number is (703)305-5384 or via e-mail addressed to [kim.huynh3@uspto.gov]. The examiner can normally be reached on M-F 8:30AM- 6:30PM.

Application/Control Number: 09/512,884

Art Unit: 2189

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Rinehart can be reached on (703) 305-4815 or via e-mail addressed to [mark.rinehart@uspto.gov]. The fax phone numbers for the organization where this application or proceeding is assigned are (703)872-9306 for regular communications and After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)306-5631.
